PROFESSIONAL SUMMARY

Entry-Level Software Developer with a Bachelor's degree in Artificial Intelligence and Data Science. Strong foundation in Java, Python, Data Structures, Algorithms, OOP, and DBMS. Hands-on experience building full-stack web applications, REST APIs, desktop systems, and machine learning models. Skilled in backend development, CRUD operations, database design, debugging, version control, and deployment. Focused on writing clean, scalable, and production-ready code.

TECHNICAL SKILLS

Programming: Java, Python, C, SQL

Core Concepts: Data Structures, Algorithms, OOP, DBMS, Problem Solving

Backend & Architecture: REST APIs, MVC Architecture, SDLC, CRUD Operations

Web Technologies: HTML, CSS

Databases: MySQL, SQLite, Database Design

AI/ML: Machine Learning, Pandas, NumPy, Scikit-learn, Generative AI

Tools: Git, GitHub, VS Code, Eclipse, Jupyter Notebook, PyInstaller

PROJECTS

Fresho Careers – Full Stack Job Portal

- Developed a full-stack job portal connecting job seekers and recruiters on a unified platform.
- Designed backend logic for job posting, listing management, and database integration.
- Implemented structured database schema and complete CRUD operations.
- Focused on clean UI, scalability, and seamless user experience.
- Deployed the application for real-world accessibility and testing.

Expense Tracker – Python Desktop Application

- Built a desktop financial management system using Python (Tkinter) and SQLite.
- Implemented real-time balance calculation with structured transaction storage.
- Designed efficient local database handling and data validation.
- Packaged the application into a standalone executable using PyInstaller.

Titanic Survival Prediction – Machine Learning

- Developed classification model using Python and Scikit-learn.
- Performed EDA, preprocessing, feature engineering, and hyperparameter tuning.
- Improved prediction accuracy through model optimization techniques.

INTERNSHIP EXPERIENCE

Java Software Developer Intern – HENOTIC, Hyderabad (Jun 2023 – Aug 2023)

- Developed and optimized Java-based modules using OOP and Data Structures.
- Improved application performance by 75% through optimized logic.
- Participated in debugging, requirement analysis, and feature implementation.

AI-ML-DS Engineer Intern – IIDT Hyderabad (May 2024 – Jul 2024)

- Built and evaluated machine learning models for structured datasets.
- Performed preprocessing, feature engineering, and performance evaluation.
- Delivered analytical insights through reports and visualizations.

ChatGPT & Generative AI Intern – Blackbuck Engineers Pvt. Ltd. (Dec 2024 – Mar 2025)

- Completed 240-hour internship focused on Generative AI and Large Language Models.
- Applied prompt engineering techniques for context-aware AI responses.
- Explored responsible AI practices and real-world LLM implementations.

CERTIFICATIONS

- Java Software Development Internship Certification – HENOTIC (2023)
- AI, ML & Data Science Internship Certification – IIDT Hyderabad (2024)
- ChatGPT & Generative AI Internship Certification – Blackbuck Engineers Pvt. Ltd. (2025)

EDUCATION

B.Tech – Artificial Intelligence and Data Science

Sagi Rama Krishnam Raju Engineering College (Autonomous), Bhimavaram

Nov 2021 – May 2025 | GPA: 6.8/10

Intermediate – Board of Intermediate Education, AP

Aditya Junior College

June 2019 – May 2021 | 87.3%

Secondary Education (SSC)

Aditya English Medium High School

June 2018 – Mar 2019 | GPA: 9.8/10
